

NTACT Operations

CONSTRUCTION

Serving the Oil & Gas and Renewable Energy Industries

Who We Are

NTACT Operations is one of the premier and most reliable Engineering, Procurement, and Construction contractors in the Permian Basin.

Founded in 2010 and headquartered in Midland, Texas, NTACT has been recognized for its outstanding safety record and efficient and economical approach to industrial construction. NTACT's distinguished qualities have rewarded them with numerous valued and trusted partnerships across the midstream markets.

Why Choose NTACT

Award-Winning Safety Program

NTACT's unwavering dedication to safety consists of a proactive and unified approach with a commitment from all employees to be responsible and accountable for safety on all projects.

Single Source Experience & Expertise

Since 2010, NTACT has functioned as a single source group offering a full spectrum of EPC services, including procurement, construction, instrumentation, electrical, and engineering for both the oil & gas and renewable energy sectors.

Responsible Growth

The NTACT team serves emerging client needs in the oil and gas and renewable energy markets while preserving environmental and social well-being for future generations. *"While quality and productivity are critical to our operations, they will never take precedence over the safety of personnel or protection of the environment."*

- Larry Molinar, President
